# Contents of Volume 131

## Number 1, September 1991

**O Oxidation over Pd and Cu Catalysts. III. Reduced $Al_2O_3$-Supported Pd**
Kyung I. Choi and M. Albert Vannice ..... 1

**O Oxidation over Pd and Cu Catalysts. IV. Prereduced $Al_2O_3$-Supported Copper**
Kyung I. Choi and M. Albert Vannice ..... 22

**O Oxidation over Pd and Cu Catalysts. V. $Al_2O_3$-Supported Bimetallic Pd–Cu articles**
Kyung I. Choi and M. Albert Vannice ..... 36

**ole of Hydrogen in the Mobility of Phases in Ni–$TiO_x$ Systems**
Agustin R. González-Elipe, Asunción Fernández, Juan P. Espinós, and Guillermo Munuera ..... 51

**he Interaction of Hydrocarbons with Copper–Nickel and Nickel in the Formation of arbon Filaments**
M. S. Kim, N. M. Rodriguez, and R. T. K. Baker ..... 60

**hemical Modification of Catalyst Support for Enhancement of Transient Catalytic ctivity: Nitric Oxide Reduction by Carbon Monoxide over Rhodium**
Byong K. Cho ..... 74

**n Observation of Homogeneous and Heterogeneous Catalysis Processes in the De-mposition of $H_2O_2$ over $MnO_2$ and $Mn(OH)_2$**
S. P. Jiang, W. R. Ashton, and A. C. C. Tseung ..... 88

**ransient Diffusion, Sorption, and Desorption of Cyclopropane in Na*X* Zeolite**
Angelos M. Efstathiou, Steven L. Suib, and Carroll O. Bennett ..... 94

**Molecular Beam Study of the Oxidative Dehydrogenation of Alcohols on Cu(110)**
P. D. A. Pudney, S. A. Francis, R. W. Joyner, and M. Bowker ..... 104

**olymer-Supported Mo and V Cyclohexene Epoxidation Catalysts: Activation, Ac-ivity, and Stability**
D. C. Sherrington and S. Simpson ..... 115

**xfoliated $MoS_2$ for Stabilization and Activation of Pt Oxidation Catalysts**
Bijan K. Miremadi and S. Roy Morrison ..... 127

**actors Controlling the Selectivity of the Oxidation of Acetaldehyde over Heteropoly ompounds**
Hiro-o Mori, Noritaka Mizuno, and Makoto Misono ..... 133

**urface Phenomena during the Oxidative Coupling of Methane over Li/MgO**
Kevin P. Peil, James G. Goodwin, Jr., and George Marcelin ..... 143

**olybdenum Disulfide as a Hydrogen Evolution Catalyst for Water Photodecomposi-ion on Semiconductors**
Andrzej Sobczynski ..... 156

**T–IR Study of the Surface Properties of the Spinels $NiAl_2O_4$ and $CoAl_2O_4$ in Rela-ion to Those of Transitional Aluminas**
Guido Busca, Vincenzo Lorenzelli, Vicente Sanchez Escribano, and Riccardo Guidetti ..... 167

**ffect of the Reduction Treatment on the Structure and Reactivity of Silica-Sup-orted Copper Particles**
C. J. G. van der Grift, A. F. H. Wielers, B. P. J. Joghi, J. van Beijnum, M. de Boer, M. Versluijs-Helder, and J. W. Geus ..... 178

**Acidity and Basicity of Metal Oxide Surfaces. II. Determination by Catalytic Decomposition of Isopropanol**
Antonella Gervasini and Aline Auroux ..... 190

**Conversion of Butane over the Solid Superacid $ZrO_2/SO_4^{2-}$ in the Presence of Hydrogen**
F. Garin, D. Andriamasinoro, A. Abdulsamad, and J. Sommer ..... 199

**Dual Mechanism of Pyridine Hydrodenitrogenation on $MoS_x$-Based Catalysts: Experimental Evidence**
A. Kherbeche, R. Hubaut, J. P. Bonnelle, and J. Grimblot ..... 204

**Oxidative Coupling of Methylbenzenes by Metal Oxides**
S. T. King ..... 215

**Active Sites for Methanol Dehydrogenation to Formaldehyde on Sodium-Modified Silicalite-1**
Yasuyuki Matsumura, Keiji Hashimoto, and Satohiro Yoshida ..... 226

**Infrared Studies of CO and/or NO Adsorption on Reduced $W/Al_2O_3$ Catalysts**
Yushan Yan, Qin Xin, Shaocong Jiang, and Xiexian Guo ..... 234

**The Influence of Platinum Concentration and Particle Size on the Kinetics of Propane Oxidation over Pt/$\gamma$-Alumina**
K. Otto, J. M. Andino, and C. L. Parks ..... 243

**An Examination of the Acid Sites in SAPO-5**
A. I. Biaglow, A. T. Adamo, G. T. Kokotailo, and R. J. Gorte ..... 252

**The Formation of Titanium Oxide Monolayer Coatings on Silica Surfaces**
S. Srinivasan, A. K. Datye, M. Hampden-Smith, I. E. Wachs, G. Deo, J. M. Jehng, A. M. Turek, and C. H. F. Peden ..... 260

**Short- and Long-Range Promotion by Sodium Additive in $D_2 + CH_2{=}CH_2$ Reaction over Silica-Supported Platinum Catalysts**
Hideaki Yoshitake and Yasuhiro Iwasawa ..... 276

*Notes*

**Reactor Dynamics in the Evaluation of Photocatalytic Oxidation Kinetics**
Allen P. Davis and Oliver J. Hao ..... 285

**Observation of the Fundamental Bending Vibrations of Hydroxyl Groups in HNa–Y Zeolite by Neutron Inelastic Scattering**
Hervé Jobic ..... 289

**Catalytic Properties of Crystalline Titanium Silicalites. II. Hydroxylation of Phenol with Hydrogen Peroxide over TS-1 Zeolites**
A. Thangaraj, R. Kumar, and P. Ratnasamy ..... 294

**Effect of Sulfiding on an Unsupported Hydrotreating Catalyst**
Teh C. Ho ..... 298

*Letter to the Editor*

**EPR Study of the Coordination Sphere of $Mo^{5+}$ Ions in UV-Irradiated Silica-Supported Molybdenum Catalysts**
B. Canosa, A. R. Gonzalez-Elipe, and M. Che ..... 300

Number 2, October 1991

**multaneous Polymerization and Oligomerization of Acetylene on Alumina and Fluridated Alumina Catalysts**
V. M. Allenger, D. D. McLean, and M. Ternan ..... 305

**hape Selectivity in Porous Catalysts**
C. McGreavy, J. S. Andrade, Jr., and K. Rajagopal..... 319

**he Role of Ni in Sulfided Carbon-Supported Ni–Mo Hydrodesulfurization Catalysts**
S. M. A. M. Bouwens, N. Barthe-Zahir, V. H. J. de Beer, and R. Prins ..... 326

**reparation of Platinum on Activated Carbon**
H. E. van Dam and H. van Bekkum ..... 335

**atalytic and Spectroscopic Studies of $Ag_{1.2}V_3Ce_yO_{8+x}$ Catalysts for Oxidation of oluene**
Zhi-Guang Yan and S. Lars T. Andersson ..... 350

**O–CO Reaction on Square and Hexagonal Surfaces: A Monte Carlo Simulation**
K. Yaldram and M. A. Khan ..... 369

**he Effect of Chloride and Water Vapor on the Pt–Ir Interaction and $IrO_2$ Agglomeion in Bimetallic Pt–Ir Reforming Catalysts**
Y.-J. Huang and S. C. Fung..... 378

**ructure and Activity of NiCo–Mo/$SiO_2$ Hydrodesulfurization Catalysts**
Jorge Laine, Joaquín L. Brito, and Francisco Severino..... 385

**atalytic Properties of Crystalline Titanium Silicalites. III. Ammoximation of Cyclohexanone**
A. Thangaraj, S. Sivasanker, and P. Ratnasamy ..... 394

**eometric and Electronic Effects in the Selective Hydrogenation of $\alpha,\beta$-Unsaturated ldehydes Over Zeolite-Supported Metals**
Donna G. Blackmond, Rachid Oukaci, Bernard Blanc, and Pierre Gallezot ... 401

**he Effect of Phosphate on the Hydrodenitrogenation Activity and Selectivity of lumina-Supported Sulfided Mo, Ni, and Ni–Mo Catalysts**
S. Eijsbouts, J. N. M. van Gestel, J. A. R. van Veen, V. H. J. de Beer, and R. Prins ..... 412

**A Study of the Acidic Properties of Pure and Composite Oxides by Inverse Gas hromatography at Infinite Dilution**
Cr. Contescu, J. Jagiello, and J. A. Schwarz ..... 433

**somerization of 1-Hexene over Pt/$\gamma$-$Al_2O_3$ Catalyst: Reaction Mixture Density and emperature Effects on Catalyst Effectiveness Factor, Coke Laydown, and Catalyst icromeritics**
Said Saim and Bala Subramaniam..... 445

**omologation and Hydrogenolysis of Linear and Branched Butenes and Butanes on u/$SiO_2$ Catalysts**
Eloy Rodriguez, Michel Leconte, and Jean-Marie Basset ..... 457

**ighly Selective Methylamine Synthesis over Modified Mordenite Catalysts**
Kohichi Segawa and Hiroyasu Tachibana ..... 482

**n *in Situ* EXAFS Investigation of Bimetallic Cu-Ni/$\gamma$-$Al_2O_3$ Catalysts**
G. U. Kulkarni, G. Sankar, and C. N. R. Rao..... 491

**Oxidative Leaching of Cu Atoms from PdCu Particles in Zeolite Y**
Zongchao Zhang, Liqiang Xu, and Wolfgang M. H. Sachtler ..... 502
**The Oxidative Dehydrogenation of Ethane over Chlorine-Promoted Lithium–Magnesium Oxide Catalysts**
Steven J. Conway and Jack H. Lunsford ..... 513
**Bifunctional Reactions of Alkanes on Tungsten Carbides Modified by Chemisorbed Oxygen**
Enrique Iglesia, Joseph E. Baumgartner, Fabio H. Ribeiro, and Michel Boudart 523
**Pyridine Hydrogenation and Piperidine Hydrogenolysis on a Commercial Hydrocracking Catalyst. I. Reaction and Deactivation Kinetics**
G. C. Hadjiloizou, J. B. Butt, and J. S. Dranoff ..... 545
**Mechanisms of the Formation of $PdNi_x$ in the Cages of NaY**
Jennifer S. Feeley and Wolfgang M. H. Sachtler ..... 573
**Catalytic Oxidation of Carbon Monoxide over Superconducting $La_{2-x}Sr_xCuO_{4-\delta}$ Systems between 373–523 K**
S. Rajadurai, J. J. Carberry, B. Li, and C. B. Alcock ..... 582
**Author Index for Volume 131** ..... 590

## NOTICE

The Subject Index for Volume 131 will appear in the December 1991 issue as part of a cumulative index for the year 1991.

# FORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous talysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of rfaces, and engineering studies related to catalysis. All articles will be published in English.

**Submission of Manuscripts.** Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the ne work has not been published, that it is not under consideration for publication elsewhere, and that its bmission for publication has been approved by all of the authors and by the institution where the work was ried out; further, that any person cited as a source of personal communications has approved such citation. itten authorization may be required at the Editor's discretion. Articles and any other material published in the *rnal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the icle, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the blisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of or her contributions to the journal.

**Form of Manuscript.** Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. bmit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and les. Originals of micrographs should also be submitted in triplicate for purposes of manuscript reviewing. All terial (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white nd paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should ntain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not ceeding 45 letters and spaces, and the name and complete mailing address (and telephone and fax numbers, if ssible) of the person to whom proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, knowledgments, and References.

n the Methods section, authors should draw attention to any particular chemical or biological hazards that may involved in carrying out the experiments described. Any relevant safety precautions should be described; if an cepted code of practice has been followed, a reference to the relevant standards should be given.

f the manuscript refers to recently submitted manuscripts or papers in press (with the *Journal of Catalysis* or er journals) then please supply three copies of them so that the reviewers can judge the new manuscript in its per context.

Revised manuscripts should be returned with one copy marked to show where changes have been made.

*Notes* and *Letters to the Editor* may not exceed 8 double-spaced typewritten manuscript pages (including tables l figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on topic, no more than one Letter from each author will be accepted.

*Units* of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctu-d (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Systeme International) system of units will be accepted without editorial change. Authors using other ts are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures quoted in Torr to write "1 Torr = 133.3 N $m^{-2}$." For information concerning SI units, see *Quantities, Units l Symbols for Physical Chemistry,* 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 8.

*Footnotes* should be avoided if possible; but if essential, they should be designated by superscript Arabic nerals (starting with title) in the text.

*Tables* should be numbered with Arabic numerals in order of mention in the text. They should be typed double-ced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the e. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

*Figures* should be numbered with Arabic numerals in order of mention in the text; each figure should have a scriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be nished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5.5 × 8 column width, 2-5/8 in.). No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Lettering on drawings should be professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 nts) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-face white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph per if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black. Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest ctures and structural formulas must be designed for direct reproduction. Illustrations in color can be accepted if the authors defray the cost.

*Electron micrographs.* Please supply three photographic copies of these so that the reviewers can inspect the fine details they contain.

*References* to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

*1.* Latef, A., Aissi, C. F., and Guelton, M., *J. Catal.* **119,** 368 (1989).
*2.* Louis, C., and Che, M., *in* "Reactivity of Solids" (P. Barret and L. C. Dufour, Eds.), Vol. B, p. 1057. Elsevier, Amsterdam, 1985.
*3.* Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

**Proofs.** Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

**Reprints.** Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

**Personal Computer Disks.** Manuscripts may be submitted to the *Journal of Catalysis* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Associate Director, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).

# Journal of Differential Equations

Editor-in-Chief

**Jack K. Hale**

*Georgia Institute of Technology, Atlanta*

This journal is concerned with the theory and the application of differential equations. The **Journal of Differential Equations** publishes articles addressed not only to mathematicians, but also to those engineers, physicists, and other scientists for whom differential equations are valuable research tools.

## Research Areas Include

- Mathematical control theory
- Ordinary differential equations
- Partial differential equations
- Related topics
- Stochastic differential equations
- Topological dynamics

Volumes 89–94 (1991), 12 issues
ISSN 0022-0396

In the U.S.A. and Canada: $708.00
All other countries: $833.00

Sample copies and privileged personal rates are available upon request.
For more information, please write or call:

**ACADEMIC PRESS, INC.,** Journal Promotion Department
1250 Sixth Avenue, San Diego, CA 92101, U.S.A.
(619) 699-6742

All prices are in U.S. dollars
and are subject to change without notice.

S1085

Devoted to the Application of Microtechniques in All Branches of Chemistry

# MICROCHEMICAL JOURNAL

***Published under the Auspices of the American Microchemical Society***

Editor: **Joseph Sneddon**
*University of Lowell, Massachusetts*

## At the Forefront of Modern Analytical Chemistry

**Microchemical Journal** focuses on microscale chemical analysis including clinically significant methods and procedures. Articles are at the forefront of modern analytical chemistry and cover innovations in techniques down to the finest possible limits.

Volumes 43–44 (1991), 6 issues
ISSN 0026-265X
In the U.S.A. and Canada: $226.00
All other countries: $286.00

### Research Areas Include

Both organic and inorganic work on

- All types of instrumentation, including clinical instrumentation
- Detection
- Determination
- Environmental analysis
- Forensic analysis
- Preparation
- Purification
- Separation
- Trace and subtrace analysis
